Tsunami, (Japanese: "harbour wave")also called seismic sea wave or tidal wave, catastrophic ocean wave, usually caused by a submarine earthquake, an underwater or coastal landslide, or a volcanic eruption. The term tidal wave is frequently used for such a wave, but it is a misnomer, for the wave has no connection with the tides.

Tsunami | Definition & Facts | Britannica

When the ocean floor moves enough, the surface finds out about it — in the resulting tsunami. A tsunami is a series of ocean waves generated by large movements or disturbances on the ocean's floor. The causes of these disturbances include volcanic eruptions, landslides, and underwater explosions, but earthquakes are the most common. Tsunamis can occur close to the shore or travel thousands ...

Tsunami facts: check out the mighty wave! | National ...

Tsunami facts What causes a tsunami? Meaning "great harbour wave" in Japanese, tsunamis are sometimes called "tidal waves" but their strength has nothing to do with the tides. About four out of five tsunamis happen within the Ring Of Fire, a zone in the Pacific Ocean where earthquakes and volcanic eruptions frequently take place.

The 10 Deadliest Tsunamis of All Time - ThoughtCo

Tsunami, a Japanese term for "harbor wave," is one of the deadliest of natural hazards. The two most devastating tsunami disasters of the 21st century were the Indian Ocean Tsunami of December 26, 2004, which impacted 14 countries and claimed the lives of over 235,000 people, and the Tohoku Japan Tsunami of March 11, 2011, causing 18,000 fatalities.

Tsunami Preparedness and Mitigation Strategies - Oxford ...

The term "tsunami" is a borrowing from the Japanese tsunami 津波, meaning "harbour wave".For the plural, one can either follow ordinary English practice and add an s, or use an invariable plural as in the Japanese. Some English speakers alter the word's initial /ts/ to an /s/ by dropping the "t", since English does not natively permit /ts/ at the beginning of words, though the original ...
