Fragment-Based Drug Discovery Hits to Leads and Lessons Learned April 3-4, 2018 | Hilton Bayfront | San Diego, California. Fragment-based drug discovery (FBDD) is migrating from a 'new/cutting edge' endeavor to a well-established approach that many companies try when searching for new drug leads. But although there are many ways to find ...

April 14-15, 2020. Fragment-based drug discovery (FBDD), a way to find new drug leads based on screening libraries of low molecular weight fragments of drug-like organic compounds, has become a part of most drug discovery teams' lead generation strategies and is especially well suited for finding hits against newer types of drug targets such as intracellular protein-protein interactions (PPIs).
