So let's begin with just one...the constant speed Hamilton Standard, commonly referred to as the "2B20". This tells us that the hub is a type 2B that fits an SAE no. 20 shaft (20 spline). This is a good place to start. Calling the prop a "2B20" only identifies the hub, with no reference to the blades.

### Hamilton Standard Replacement ... - RSW Products, Inc.

Many of the hydromatic propellers are used with older type aircraft involved in cargo operations. The main advantages of the hydromatic propeller are the large blade angle range and the feathering and reversing features. Larger new turboprop systems also use opposing hydraulic force and double-acting governor systems. The hydromatic propeller is composed of four major components: hub assembly ...
